

PREFABRICATED CONSTRUCTION

Falkbuilt is digitizing interior construction.

VERTICAL MARKETS | COMMERCIAL • GOVERNMENT • HEALTHCARE • EDUCATION

We precision cut digital components in our factory and deliver them onsite for a fast, efficient and clean install. We use far fewer materials, speed up the schedule and virtually eliminate waste on the job site.

**We call it Digital
Component Construction.**

Falkbuilt Advantage

CUSTOMER SERVICE

Falkbuilt by Tangram services clients all over the country. That means consistent execution teams without borders.

DESIGN

Our designers are educated in interior design and have extensive work experience beyond Falkbuilt. Using Revit and Enscape, designers easily collaborate without hurdles of proprietary software.

ACOUSTICS

Our partition exceeds conventional construction standards. Partitioning that meets a minimum 44 STC and exceeding that with additional components.

LEAD TIME

Construction phasing is designed at the time of production. We're getting materials to site in 4 weeks time and phasing additional materials as needed to fit the project schedule.

INSTALLATION

Following conventional sequencing we use 30% less material on site and ¼ less labor on-site. This improve your schedule allowing you to access the site sooner for a quicker opening day.

DIGITAL ASSET

Prefabricated materials emulate conventional construction without the wasted time on-site cutting and modifying. All parts are tagged with a QR code and kept as digital assets in ECHO for easy reproduction.

LONG TERM VALUE

10-year manufacturers warranty plus Falkbuilt qualifies for an IRS section 179 deduction.

SUSTAINABLE

We reduce waste from the design process all the way through to manufacturing and installation. Our materials arrive to site flat packed, reducing freight emissions and cost.
